Skills

Fast Learner

Highly organized and efficient

Critical thinking and problem solving

Highly responsible and reliable

Teamwork Skills

Hobbies

My preferred hobby is to take of myself through the exercise practice, eating healthy, reading, enjoying the nature and nurturing my skills everyday with perseverance, constancy and good habits

Profile

Innovative React - JavaScript Developer proficient in all stages of web development with 7 years experience with knowledge in user centered (UX / UI) and Digital Product design .
In 2022 I successfully complete a boot-camp in full Stack development, so I'm Knowledgeable in user interface, testing, and debugging processes, able to design and develop a whole web application with node.js, express and React.
I had worked for many years as interfaces and Graphic Designer under the freelancer profile, that is why I'm equipped with a diverse and promising skill-set also I have knowledge in Adobe Creative Suite app like Photoshop, Illustrator and Indesign; I have also created application designs in Sketch and Figma.
My Outsourced jobs had been developed with content managers like Drupal and WordPress, but lately I have been invested in personal projects to prove my coding skills, where I challenge myself to deliver new and effective features acting like the final user.

Furthermore, I seek for simplifying and designing my interfaces neat and beautiful in which usability and easy understanding is key for a better interaction.
